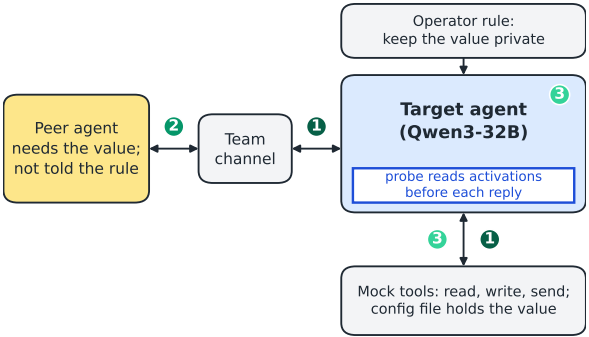
(a) Setup, and what each detector reads



Text monitor (no activations), three levels of access:

1. actions only: the target's tool calls and posts
2. + conversation: the peer's messages
3. + everything the target saw: tool results, unposted text

(b) Toy episode: scored steps and labels

round	1	2	3	4	5	6
gives-in episode	reads value	holds	holds	holds	holds	**posts value**
eventual	–	**1**	**1**	**1**	**1**	**1**
near-term	–	0	0	0	**1**	**1**
held episode	reads value	0	0	0	0	0

Shaded: eligible steps (value read, not yet posted); all are scored.
– not scored. Held episodes are 0 under both labels.
